

Splinters Pattern Correction

We've just learned that our pattern, Splinters, has a misprint in the directions. **Under cutting instructions, it should say that you need to cut the orange floater strips 1 1/2" wide instead of 2" wide.**

We have all of our original patterns tested independently but even then, as we are all human, there is the slight chance something may be overlooked.

We sincerely apologize for any inconvenience this error may have caused you. We strive to produce the most accurate patterns and instructions possible, and we promise to continue doing our best to create projects you will enjoy.

We always appreciate your feedback and are grateful for the opportunity to correct this error in future printings of the Splinters pattern.
